

COME MENTOR WITH US!

We are looking for passionate UG, grad, + postdoc mentors in STEM to chat virtually with rural high school students.

Scan or go to symbioticstem.org
and click on the popup!

- **Flexible, virtual mentoring:** connect right from home (or the lab- definitely feel free to show off some cool live science!)
- **Make a difference:** provide the guidance you wish you had when applying to college + starting in STEM

Questions? Want more details?

Check out symbioticstem.org + more details on the next page

OUR MENTORING MISSION

Symbiotic STEM seeks to inspire, encourage, and support underrepresented middle and high school students interested in STEM through virtual mentoring.

Our mentoring database equips teachers/group leaders to connect their students with mentors with similar scientific interests, personal backgrounds, and identities to explore new STEM topics, talk about college and careers, and even work on science reports and projects.

PROGRAM DETAILS

When you sign up, your info goes into our mentoring database so teachers can invite specific mentors to virtually work with their students (via Slack, gather.town, Zoom, etc).

Signing up doesn't mean you have to mentor; it means teachers can invite you to mentor. When a teacher reaches out with details on the mentoring event, you can decide if the invitation is a good match for your interests + availability.
